# ABSTRACT

- In this project we are developing a website for the TIM company. We are following the basic principle for the good design of a website; starting from the C-IDM, L-IDM and P-IDM schemas, we made a mockup of the preliminary version using Balsamiq. We split the work as following:
- Gianpaolo Branca: C,L,P IDM Schemas and Devices
- Giovanni Pelosi: SL Services and Who we are
- Davide Suppa: Assistance services and The group
